

Line 7: Cultural Heritage Rehabilitation

“Antonio Gala” Cultural Centre: Rehabilitation and Enhancement

La Rinconada Town Hall

1. INTRODUCTION– SUMMARY

The ERDF funds are making a major contribution to the urban development of the municipality of La Rinconada (Seville). One of the most significant lines within this strategy is the contribution to the rehabilitation of cultural heritage.

Among the different actions that are being developed, it is worth highlighting the one called: “Antonio Gala” Cultural Centre: Rehabilitation and Enhancement.

This operation consists of the integral rehabilitation of the Cultural Centre, which was out of service because it did not meet the requirements demanded by the cultural authorities, with the aim of complying with cultural regulations, dignifying and renovating the obsolete facilities, modifying the structure and design of the theatre, and expanding the capacities, production, quality, and possibilities of enjoyment of this centre. In this way, the cultural and creative activity in the centre of La Rinconada will be boosted.

The Antonio Gala Theatre was opened on February 10th, 1995. It was in a state of deterioration, with problems of accessibility for disabled people, safety problems in access due to the narrowness of the urban road, sanitary problems, unsustainable enclosures, leaks in the roofs, etc. Due to these circumstances, it was necessary for the Town Hall to intervene effectively to improve the conditions offered to both artistic and creative entities and the public in order to be able to hold cultural and artistic activities. By creating this new scenic space with a modern and functional design, the municipality aims to complete its "great cultural ring," facilitating the connection between creators and the public to whom they are addressed, to develop, promote, or host activities in different areas of culture in any of its manifestations.

BEFORE THE REFURMISHMENT

AFTER THE REFURMISHMENT

The total investment in this action has been 800.351,55 €, of which 384.000,00 € corresponds to the ERDF co-financing. The impact of the action is reflected, on the one hand, in the adaptation of the “Antonio Gala” Cultural Centre and its adaptation to the current demand for use and the need to renovate these obsolete facilities, and on the other hand, in the use and enjoyment by the citizens of La Rinconada of this theatre, as they had previously been deprived of access to nearby cultural services.

2. CRITERIA

This action meets all the criteria to be considered a good implementation practice co-financed by ERDF.

2.1. The action has been adequately disseminated. The role of the ERDF in the action has been adequately disseminated to beneficiary entities and to the general public.

A total of 4,626.00 € has been invested in this operation in communication and awareness-raising actions on the operation implemented (i.e. 0.58 % of the total expenditure).

// INFORMATION LEAFLET

An information leaflet was published for printing and dissemination in the area of the action and in the rest of the municipality.

Regeneración del Patrimonio Histórico y Cultural

Otro de la estrategia "La Rinconada. Ciudad Única 2022" se profundiza en un eje de actuación encaminado a la modernización y rehabilitación de espacios e centros municipales con la consideración de patrimonios históricos y culturales, mejorando su estado de conservación y promoviendo su uso eficiente por la ciudadanía de La Rinconada y visitantes. El objetivo es la mejora global del patrimonio, revitalizando el impulso de la oferta de proximidad en las zonas.

Europa se alinea con la Rinconada para el refuerzo del patrimonio histórico, labrando sentimiento de pertenencia a un municipio como La Rinconada. Embelleciendo zonas de identidad para la ciudadanía, que aportando con orgullo al vecino y todo ello, recordando y adecuando las actuaciones desde una perspectiva integral, pero también implementando y empleando servicios y la accesibilidad a los mismos por parte de los vecinos y vecinas, para que sean partícipes del legado que a la larga de su aldea, conforma en sí mismo la historia de nuestro municipio.

La Rinconada, una Ciudad Única

Ciudad Única 2022 es la Estrategia y Visión de Ciudad a largo plazo de La Rinconada. Un modelo que ha obtenido una alta valoración en la convocatoria nacional de Fondos FEDER en la que han participado territorios de toda España. Europeístas, innovadores, modernos, tecnológicos y social. La Rinconada del futuro está en marcha. Suma de cultura, participación ciudadana y gestión eficiente y controlada, en múltiples las oportunidades para todos en pueblo, hoy y mañana. La Estrategia de Desarrollo Urbana Sostenible Integrada (EDUI) moviliza 8,2 millones de Fondos FEDER y del Ayuntamiento de La Rinconada se suma en un Plan Estratégico de una inversión más superior que suma en el próximo trienio más de 50 millones de euros, entre inversiones, obras y complementos de otras Administraciones.

"La EDUI 'Ciudad Única' está respaldada por el Gobierno de España y Europa como proyecto de ciudad con la certidumbre de la integración urbana que supone 'La Unión'."

Rehabilitación del Centro Cultural Antonio Gala

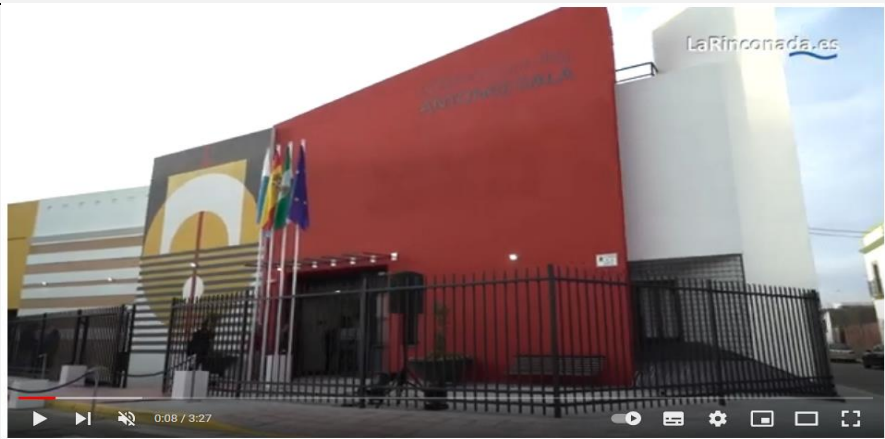

El Centro Cultural Antonio Gala ha sido concebido a una profunda rehabilitación y modernización, con un presupuesto próximo a los 700.000 euros. Se ha recuperado el patrimonio del acceso a la planta principal, con elevados estándares de accesibilidad con la planta inferior, donde se localizan los camerinos, se han añadido y cableado en planta primera (parqueo) hasta un total de 200 plazas de aparcamiento. La fachada exterior también se ha rehabilitado con un mural de la artista leonesa Isabel, que simboliza un círculo creativo, un espacio vivo de interacción en el que todo el mundo tiene cabida y diferentes. Asimismo, el Centro Cultural Antonio Gala tiene su importancia en la rehabilitación, permitiendo la transición del arte y la cultura en sus diferentes manifestaciones, facilitando la comunicación, promoción, difusión, interpretación y práctica cultural en sus distintos y variados espacios.

El Antonio Gala fue inaugurado el 10 de febrero de 2019 y alberga su sala de producción cultural 'Tempo' que genera espacios culturales y sociales desde un alto compromiso con la cultura social-comunitaria. Con la reforma surge ideas y nuevos servicios públicos no existentes en el entorno. Además de la creación una amplia sala de exposiciones y tres nuevos salas de exposición y formación para actividades del Sector Cultural favoreciendo la participación ciudadana, se han creado espacios para actividades socio-culturales de la mano de CDPH y ES a partir de iniciativas transverbiales y en ciudadanía. El nuevo Antonio Gala brinda infraestructuras oportunitades para crear e impulsar áreas públicas gratuitas y diferentes. Asimismo el resto de áreas de la diversidad y de mejorar la reflexión, la emoción y la libertad. Este nuevo Gala está abierto a seguir aprendiendo territorio y generando conciencia, todo para mejorar el arraigo de las letras, el legado y la obra del Gran Teatro Provincial de Salamanca. Otra manifestación del patrimonio cultural de La Rinconada.

Estimated impact on population = 28,000 inhabitants.

El Centro Cultural 'Antonio Gala' del municipio sevillano de La Rinconada ha abierto sus puertas tras la remodelación integral a la que ha sido sometido y que incluye mayor aforo, sala de exposiciones y nuevas dependencias para compañías y participación ciudadana.

En un comunicado, el Consistorio rinconero señala que "los centros culturales tienen suma importancia en la educación porque permiten la transferencia del arte y la cultura, facilitan la comunicación, promoción, difusión, interpretación y práctica del arte, en sus distintas y variadas expresiones".

El 'Antonio Gala' fue inaugurado el 10 de febrero de 1995 y alberga espacios cedidos a asociaciones y colectivos ciudadanos para que puedan preparar su actividad, además de ser una piedra angular en la nutrida programación cultural del Ayuntamiento.

Las obras, cofinanciadas con Fondos Feder por un importe próximo a los 700.000 euros, han consistido en la ejecución de una nueva escalera de acceso a la planta primera, resuelta con estructura metálica, un hueco para el elevador que conecta el escenario con la planta sótano, donde se localizan los camerinos, y gradas en la planta primera (anfiteatro), mediante pilares y vigas de acero sobre los que apoyan estructuras prefabricadas de hormigón pretensado.

11 JUNIO 2018

#REFORMAS INFRAESTRUCTURAS centro cultural

La reforma integral del Antonio Gala impulsa las dotaciones en el núcleo de Rinconada

Se va a remodelar la fachada y los accesos, así como el interior del edificio, edificándose un anfiteatro que permitirá ampliar el aforo con una inversión total de 530.000 euros

La Rinconada es cultura y el trabajo involucrado en ese sentido no consiste sólo en programar un abanico de propuestas interesantes para la ciudadanía, sino que también hay que velar por el buen estado de los espacios existentes de los que dispone el municipio. Dentro de esta línea de actuación se plantea un proyecto de mejora que va a permitir ampliar las posibilidades, la producción, la calidad y el disfrute del Centro Cultural Antonio Gala. Fue inaugurado el 10 de febrero de 1995 y alberga no sólo producción cultural referente al Ayuntamiento, sino también espacios cedidos a asociaciones y colectivos ciudadanos para que puedan preparar su actividad. Al tratarse de un edificio de más de 20 años, con el fin de adecuarlo a la demanda de uso actual y a la necesidad de renovar instalaciones, se han proyectado obras de renovación y ampliación con un presupuesto de 530.000 euros, cofinanciadas con fondos propios municipales y fondos de Entidades de Desarrollo Urbano Social de la Junta de Andalucía (EDUS).

En concreto, se va a ejecutar una nueva escalera de acceso a la planta primera, que se va a ejecutar un hueco para el elevador que conecta el escenario con la planta sótano donde se localizan los camerinos, y se van a llevar a cabo gradas en planta primera (anfiteatro), mediante pilares y vigas de acero sobre los que apoyan estructuras prefabricadas de hormigón pretensado.

Previo a esta actuación, se va a proceder a eliminar la solería existente, una vez realizado el replanteo y a continuación se ejecutará la obra necesaria para la cimentación y el anclamiento, así como se realizará la demolición selectiva de aceras de baldosa o pavimentos de mezcla.

Se trata de una inversión dentro de la línea de rehabilitación que permitirá nuevos usos.

El delegado de Urbanismo, Francisco Manuel Díaz, ha destacado que "siempre trabajamos en la mejora y modernización de infraestructuras y el Antonio Gala es un ejemplo más de ello, lo que nos va a permitir aumentar el aforo y mejorar el rendimiento del centro cultural". Por su parte, la edil de Cultura, Raquel Vega, ha subrayado que "se trata de una inversión dentro de la línea de rehabilitación y patrimonio cultural que va a permitir nuevos usos del edificio".

Trabajo en el exterior

Dentro de la reforma a la que se va a someter el Antonio Gala, se van a sustituir las carpinterías exteriores actuales de acero pintado y vidrio simple por carpinterías exteriores hecho de color pretensado de aluminio termoaisladas. Con esta actuación se pretende la mejora en la calidad de construcción del edificio, mejorando las condiciones acústicas que requiere el uso al que está destinado y por otro lado, la mejora en cuanto al ahorro energético. Se proyecta la ampliación del acorralo hacia la planta sótano Lote y Osting, ya que así por esta calle donde se proyecta el nuevo acceso principal al edificio. En esta ampliación del espacio peatonal, se crea una zona ornada por un vallado de acrílicos concretados al existente con dos grandes puertas corredizas de 6 metros que en días de temperaturas que superan gran altura de pública se se encierran la circulación.

Dentro de las actuaciones en el exterior del edificio se crean algunas veredas de la futura sala de exposiciones de tal manera que se permita utilizar los pasillos para exposiciones de cuadros. Debido al descenso del revestimiento exterior de la edificación se hace necesario su picado y su sustitución por un embalsado monocapa.

Trabajo en el interior

Inicialmente, se realiza una redistribución de los espacios. Se mejoran las instalaciones contra incendios, electricidad, iluminación, fontanería, saneamiento, ventilación y climatización. Sobre la solería existente de baldosa de terrazo se colocan pavimento vinílico de alto tráfico, antideslizante y con absorción acústica, consiguiendo una mayor seguridad de circulación y una mejor estética. Además, se cambian las carpinterías interiores que garantizan los niveles de ruido mejorando la accesibilidad a todos los espacios, se colocan puertas con aislamiento acústico para mejorar las condiciones acústicas de los distintos salones. Por último, se instala un divan de habitación en sustitución de la escalera de mano que comunicaba la planta con el sótano.

Imagenes de las obras a realizar en el teatro.

Exterior del Centro Cultural Antonio Gala.

El Centro Cultural Antonio Gala acoge la exposición 'Yo soy flamenco'

Hasta el 14 de abril, la sala de exposiciones del teatro recibe esta muestra que reúne 25 fotografías andalzas del flamenco actual, del cante, del baile y del toque, muchos de ellos artistas consagrados

El área de Cultura continúa con su programación de primavera y trae al Centro Cultural Antonio Gala la exposición 'Yo soy flamenco' de Diputación de Sevilla. Una muestra que recoge 25 fotografías andalzas del flamenco actual, del cante, del baile y del toque, muchos de ellos artistas consagra-

dos, que gozan de reconocimiento internacional y otros aún emergentes o en plena trayectoria, todas ellas, obra de los fotógrafos sevillanos Eduardo Briones y Javier Díaz.

El objetivo de 'Yo soy flamenco' es acentuar lo que supone para los artistas la creación bajo el signo del flamenco, ahora que se cumple el décimo aniversario de su declaración como Patrimonio Inmaterial de la Humanidad por la UNESCO, y con una singularidad: cada una de las imágenes tiene como escenario un monumento considerado Patrimonio (el Alcázar de

Sevilla, la Mezquita de Córdoba, la Alhambra de Granada o el Coto de Doñana), o alimentos constitutivos de la dieta mediterránea, que está también declarada Patrimonio Inmaterial de la Humanidad.

El mosaico de fotografías compone un testimonio gráfico de la realidad cultural que es el flamenco y va acompañado de textos autobiográficos, en los que los protagonistas de las instantáneas (Arcángel, Argentina, Aurora Vargas, Carmen Linares, Cristina Hoyos, Diego Carrasco, Dorantes, El Pele, Esperanza Fernández, Eva Yerbabuena, Farruquito, Javier

Apertura de la muestra con el cantaor Juan Pinilla.

Barón, José Valencia, Jesús Méndez, Manolo Marín, Manuel Lombo, Manuela Carrasco, Marina Heredia, Pastora Galván, Patricia Guerrero, Pedro El Granaino, Pepa Montes, Rocío Márquez y Sara Baras) narran su vivencia del flamenco, que es un

estilo de vida, ofreciendo las claves para entender la esencia y el desarrollo de este arte.

La exposición se podrá visitar hasta el 14 de abril excepto durante los días de Semana Santa de martes a viernes desde las 17.00 horas y hasta las 20.00 horas.

El Carnaval de La Rinconada abre las cortinas del teatro

FIESTAS MAYORES | 16/02/2022

El Antonio Gala acoge la primera función semifinales de las cuatro previstas antes de la gran final, que se celebrará el sábado. Cuatro agrupaciones, dos chirigotas y dos comparsas, regalaron sus coplas al público. Esta noche actúa la primera agrupación local, la chirigota del Barbas, 'Los del verdadero TikToc'

Después de no poder celebrarse el certamen de Agrupaciones en 2021, por culpa de la pandemia del Covid-19, las coplas de Carnaval volvieron a La Rinconada en la primera función de semifinales en un Antonio Gala immaculado, que aguardaba impaciente a las chirigotas y comparsas que compiten por ganarse el corazón de la localidad.

En total, participan 18 agrupaciones de toda la provincia, un número menor que en otras ediciones, pero de un enorme valor, dada la considerable reducción de agrupaciones que ha registrado la provincia de Sevilla. Y es que la incertidumbre por lo que iba a deparar la evolución del dichoso Coronavirus y el cambio de fechas en el Carnaval de Cádiz, han supuesto una importante merma en la provincia de Sevilla. Por ello es todo un éxito de participación. Como destaca el delegado de Fiestas Mayores, Rafael Reyes, 'la inmensa mayoría de las agrupaciones de la provincia de Sevilla están en el carnaval de La Rinconada'.

["El Carnaval de La Rinconada abre las cortinas del teatro"](http://larinconada.es)

The operation has deployed a wide range of face-to-face and online media to raise public awareness:

- An information leaflet on the operation was published, and invitations were distributed to announce the opening ceremony of the park.
- A communication campaign was developed through several sponsored articles in the most popular digital newspapers among the population of La Rinconada.
- Being aware of the transformation, both visual and social, that the area of action was going to undergo and the informative relevance that the audiovisual media have today, it was decided to make a video of the inaugural event, which was attended by both authorities and local residents, evidently demonstrating the substantial change in the environment. This video has been published on YouTube and disseminated through the municipality's social networks.
- Finally, a news item was published in the municipal newspaper.

It should be noted that all the communications made included the elements required by the reference regulations: The European emblem, the reference to ERDF co-financing, and the slogan "A way to make Europe." As well as appearing on the information poster for the works, these elements also appear on the reports, specifications, projects, invoices, etc.

WORK POSTER

SHEET REFERENCE

2.2. The action incorporates innovative elements. *The innovative nature of the action is linked to the methodologies, technologies, or processes, the services provided, and the different tools used. It is also considered innovative with regard to the territory or area of implementation.*

On the occasion of the complete refurbishment of the theatre, renovation and extension works have been carried out, the most notable being the creation of an amphitheatre, increasing the seating capacity, and planning a new exit to comply with evacuation conditions in case of fire. The previous entrance door has been modified and is now used for emergency access, and a new entrance has been added to give access to the building's hall. In relation to this new access, the pavement outside has been widened to allow public access, and the area has been enclosed with a fence, similar to the previous one, to ensure that it is a safe area when there is a large influx of people. A canopy has also been installed in order to make the access more distinctive.

arious installations have been renovated, including fire protection, electricity, lighting, plumbing, sanitation, ventilation, and air conditioning. As for the flooring, the existing tiles have been used to lay high-traffic, non-slip vinyl flooring on them, which is important to improve slipperiness, but the most significant feature of this is that it has acoustic absorption, thus improving the acoustics of the building. The interior carpentry has been changed, as these guarantee passage widths with the aim of improving accessibility, with new doors that also contribute to acoustic insulation.

In addition, new light and sound equipment has been purchased. New furniture has also been purchased, and existing furniture has been refurbished. Another new installation was a hydraulic lift to replace the ladder that connected the stage with the dressing rooms. Some of the windows of the future exhibition hall have also been blinded.

The innovation of this project also lies in the energy efficiency measures that have been taken, as the exterior carpentry has been replaced by coloured lacquered aluminium carpentry with a thermal bridge break fitted with thermo-acoustic glass, which greatly improves energy savings. This measure is another example of La Rinconada's commitment to sustainable development by being energy efficient.

The exterior cladding has been completely renovated with a new exterior design for the building, characterised by its modern style combining colours with a clean and simple design. Undoubtedly, this brings an air of freshness and contemporaneity, reinforcing the value of the area.

NEW AMPHITHEATRE

RENEWED SCENARIO

2.3. Adequacy of the results obtained to the established objectives. *The main objectives are highlighted, showing the added value of having received European Funds.*

Thanks to ERDF co-financing, the results that had been established from the outset have been achieved. One of these objectives is the energy savings that will be achieved thanks to the thermal insulation provided by the new joinery; as well as the modification of the main access to the building, which, on days of shows or events with a large number of people, will no longer hinder pedestrians on the road. The comfort of the building has been greatly improved by upgrading the acoustic conditions, and the public will now be able to enjoy a higher quality of cultural performances.

But the most valuable result has undoubtedly been the creation of the new amphitheatre, as the capacity of the first floor has been increased, something that will have a very positive impact both for the artists and for the public who wish to attend the performances, as well as the furniture in the stalls has been renewed, contributing to the comfort of the audience. Due to this increase, it has been necessary to design a new exit on the upper floor to comply with fire safety regulations.

Likewise, these new facilities have been designed to serve the new uses and to comply with the regulatory requirements applied to public buildings, which is why it has been necessary to fit and renovate fire, electrical, lighting, plumbing, sanitation, ventilation and air-conditioning installations, as well as light and sound.

Another fact that has increased the quality of the space has been the change in interior carpentry, as the passage widths have been guaranteed, thus improving accessibility to all spaces, which is something remarkable, as it is necessary for public buildings to be accessible and inclusive. In addition, acoustic insulation doors have been installed to improve conditions in the different rooms.

Furthermore, in order to improve the quality of the performances, new windows have been installed, which do not have the darkening system, and blinds have been fitted to allow light and darkening regulation. A hydraulic lift has also been installed to replace the ladder to connect the stage with the basement where the dressing rooms are located.

2.4. Contribution to the resolution of a problem or weakness detected in the territorial area of implementation. *A description is given of the problema that the Project presented responds to and how its implementation favours the development of the territory.*

There are many problems in the area of action that have been solved thanks to the contribution of ERDF funds. In this regard, it should be noted that, within the framework of the operation, a socio-economic diagnosis was carried out to assess the reform, as this has been integral due to the obsolete facilities, with the aim of improving the conditions of the existing infrastructure.

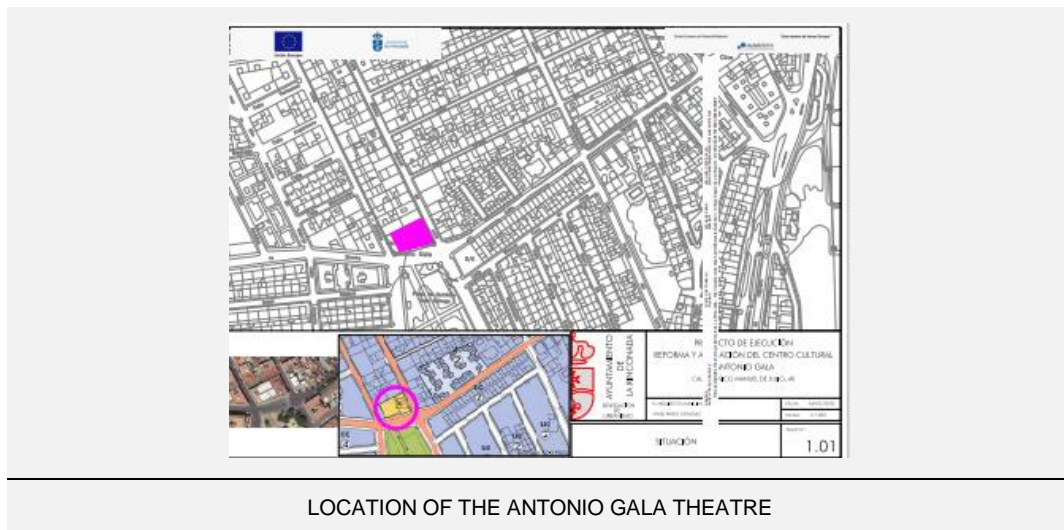

Prior to the performance, the Theatre was out of service because it did not meet the requirements of the cultural authorities in order to comply with cultural regulations.

In 2018 it was in a state of disrepair, with accessibility problems for people with disabilities, safety problems access due to the narrowness of the urban road (with heavy vehicle traffic), sanitary problems, unsustainable enclosures, leaks in the roofs, etc.

As a consequence of this situation, the theatre was out of service, closed and the cultural activities had been moved to the “De la Villa” Cultural Centre, located in the area of San José de La Rinconada. Being located at a distance of 5 km, the population of La Rinconada has been deprived of access to nearby cultural services for several years. They have to travel by private vehicle through uninhabited areas and agricultural zones of the municipality, often at night, which does not contribute to the safety of citizens.

Clearly, its implementation has returned cultural wealth to the town, as this infrastructure has an undeniable instrumental value, being able to offer a wide range of activities and services where citizens can project their cultural initiatives, individually and collectively.

In this sense, the cultural activity of the municipality will be jointly promoted, enabling it to become a driving force for creativity, completing the “great cultural ring” of the town.

LOCATION OF THE ANTONIO GALA THEATRE

2.5. High degree of coverage of the population. *Mention is made of the outreach, not only to beneficiaries but also to the general population.*

The execution of this operation has a direct impact on the population of La Rinconada, which amounts to 10,163 people, who will be able to enjoy a cultural programme without having to travel outside their town centre.

It will also have an indirect effect on residents of other towns, such as San José de La Rinconada, or other nearby localities, making it attractive for them to travel to La Rinconada to spend their leisure time in the activities and performances offered by this totally renovated space, which is accessible to all.

For these same reasons, and taking into account the existing distance between the towns of La Rinconada and San José de La Rinconada, it is possible to affirm that the total population of the municipality of La Rinconada (39,509 people) will be benefited by this action, which will have an impact on education, the transfer of art and culture, as well as the practice of art in its different and varied expressions, which will have an impact on our neighbours.

LOCATION OF THE THEATER IN THE MUNICIPALITY OF LA RINCONADA / PLATE REF. EU

2.6. Consideration of the horizontal criteria of equal opportunities and non-discrimination, as well as social responsibility and environmental sustainability.
Indicate how these criteria have been applied in the corresponding action.

As with any EDUSI operation, the horizontal principles of the POPE have been taken into account for the implementation of this operation.

One of the fundamental pillars in the selection and execution of the operation for the rehabilitation and enhancement of the “Antonio Gala” Cultural Center has been equal opportunities. In fact, this principle has been taken into account from the very selection of the operation, since La Rinconada Town Hall has an Equality and Social Welfare Area, that has actively participated in the integral reform of the Theater, providing corrective measures to promote accessibility to it, and supervising the documentation generated in all its phases.

Moreover, in the execution of the project itself, the incorporation of non-sexist language and images has been considered, both in the documentation of the files and in all the dissemination activities carried out.

We must emphasize that one of the objectives of the area of Equality of our municipality is: “To promote the active participation of women in all areas, with special emphasis on the social, cultural, labor and educational”; This is why a local artist, Marta Quintero, was chosen for the building’s inaugural concert, as a representative of women of La Rinconada. With the same purpose, many activities are carried out to highlight the importance of the female gender for the culture in our town. For example, an activity will be held within the program “*Estación de las Letras*” (dedicated to literature), the presentation of a finalist work for the *Premio Planeta* (Spanish literary prize) of the writer Cristina Campos.

- The importance of accessibility to the facilities is another principle that has been taken into consideration in the execution of the work, since:
- The accesses have been adapted for people with reduced mobility, mainly the new main access by widening the sidewalk area.
- High traffic and non-slip vinyl pavement has been installed to improve the safety of people using wheelchairs or similar.
- Se han cambiado las carpinterías interiores para garantizar los anchos de paso en el interior, mejorando la accesibilidad en todos los espacios.

- The interior carpentry has been changed to guarantee passage widths in the inside, improving accessibility in all spaces.

In addition, in order to contribute to environmental sustainability, energy efficiency measures have been taken into account, replacing the previous ones with colored lacquered aluminum carpentry with thermal bridge break, improving the building's energy savings.

2.7. Synergies with other Policies or public intervention instruments. *This takes into account that the intervention has reinforced the action of other policies and has contributed to reinforcing positive aspects of the same.*

This action presents synergies with other policies or instruments of public intervention, mainly with the Cultural Policy of La Rinconada, which is marked as purposes:

- Promote the expansión of performing arts programming, with attention to local companies, enterprises and artists, as well as new creations.
- Fomentar las raíces culturales andaluzas, fomentando el flamenco como elemento de relevancia de nuestra identidad.
- To foster Andalusian cultural roots, promoting flamenco as a relevant element of our identity.
- As well as promoting the local Cultural Centres, among which is the Antonio Gala, likewise other public spaces as engines for generating creative and cultural activity.

It is important to mention that in cultural policy, we cooperate with the cultural policies of the Regional Government of Spain, on the basis of the Creative Europe Program / Culture Subprogram, an EU program to promote the cultural and creative sectors.

It is also in line with the 2030 Urban Agenda, as it aims to deepen urbanism with cultural sensitivity in the design of the city, as well as to prevent and reduce the impacts of climate change and resilience.

In this regard, we should mention the synergy with the Action Plan for Sustainable Energy in the municipality (Covenant of Mayors), which sets out the lines to be followed to improve the environmental situation of the municipality, such as the revaluation and improvement of the urban space.

Furthermore, it correlates with the Department of the Environment of the Regional Government of Andalusia, through the Energy Sustainability Plan, which aims to substantially improve the commitment to renewable energies, energy savings and efficiency.
